Region Three: Peoria/Quad Cities

Region Three covers the following 14 counties:

The counties of Fulton, Hancock, Henderson, Henry, Knox, Marshall, McDonough, Mercer, Peoria, Rock Island, Stark, Tazewell, Warren and Woodford are located in Region Three: Peoria/Quad Cities.

Landfills

Nine landfills in the Peoria/Quad Cities area reported more than 304.0 million gate cubic yards of capacity remaining at the beginning of 2013. Total capacity was almost 40.9 million gate cubic yards more than the amount that was reported the previous year. Total capacity in the region increased 15.5 percent from the previous year.

These landfills in Region Three accounted for 29 percent of the almost 1.1 billion gate cubic yards of disposal capacity remaining statewide on January 1, 2013.

The Quad Cities Landfill, Phase IV, landed in the top ten ranking of all landfills in the state in terms of capacity; it ranked sixth, due to its proposed vertical and lateral expansions which were approved by the Agency on June 13, 2012. Two other landfills were ranked 11th and 12th respectively in terms of capacity remaining as of January 1, 2013: they were Indian Creek Landfill #2, Hopedale and Atkinson Landfill, Atkinson.

Sixty-four years of landfill life remaining

The most years of waste disposal remaining were 64 years in the Peoria/Quad Cities region. Chicago Metropolitan Region had the least, at 11 years. This can be compared to the 26 percent of landfill life remaining state-wide.

Waste disposal amounts declined by 1.8 percent

The Region's eight landfills active in 2012 reported accepting almost 4.8 million gate cubic yards of waste for disposal, which was 89,474 fewer gate cubic yards than in 2011, a decline of 1.8 percent.

Seventeen percent of waste receipts came from seven other states

Of the more than 39.5 million gate cubic yards of solid waste disposed in landfills in Illinois in 2012, 13.5 percent was imported from nine other states. For Region Three, 17 percent of its waste receipts originated from seven of these nine states. The amount of 818,733 gate cubic yards of out-of-state waste was disposed at four of the Peoria/Quad Cities area landfills.

Fifty-seven (57) percent of the out-of-state waste accepted at Quad Cities Landfill, Phase IV, was from Iowa and Wisconsin. One percent of the waste accepted at Upper Rock Island County Landfill came from Kentucky. Envirofil of Illinois, Macomb accepted less than one percent of its waste from Iowa. Peoria Disposal Company (PDC) #1, Peoria also accepted waste from Iowa and Wisconsin, as well as Indiana, Kentucky, Minnesota, Missouri and South Dakota.

Spoon Ridge Landfill has ranked first in capacity for 15 years

The State's largest landfill, Spoon Ridge Landfill, Fairview, has 43.8 percent of the landfill capacity in the region, translating to 12.7 percent of the State's capacity. The facility has been the state's largest landfill since January 1, 1998, but has been inactive from June 2008 through the present.

An affidavit for certification of completion of closure (Log No. 2011-250) has been submitted to Agency for review. Once approved the permitted capacity will be zero.

Quad Cities Landfill, Phase IV proposes to expand, with its construction now receiving approval from the Agency in 2012

The owner and operator requested approval from the Agency for a vertical and horizontal expansion amounting to greater than 15.4 million cubic yards expansion at Quad Cities Landfill, Phase IV, Milan. Approval for construction was granted on June 13, 2012. This brings this landfill into the top ten listing of all of the State's landfills in terms of capacity; it ranks sixth. In addition, a compost facility named Quad Cities Compost Facility was also permitted to open at its landfill location on March 11, 2011. It actually opened for business in April 2011.
