

Region Six: St. Louis Metropolitan East

Region Six covers the following nine counties:

The counties of Bond, Clinton, Fayette, Madison, Marion, Monroe, Randolph, St. Clair and Washington are located in Region Six: St. Louis Metropolitan East.

Landfills

During 2012, three St. Louis Metropolitan East facilities received almost 18.3 percent of solid wastes disposed of in landfills statewide. This was the third highest amount disposed of in landfills behind Region One Northwestern Illinois which reported 24.3 percent waste share and Region Two: Chicago Metropolitan at 19.0 percent.

The amount of solid wastes in the Region disposed in 2012 decreased by more than 4.7 percent from the previous year. More than 7.1 million gate cubic yards of wastes were disposed of in landfills in the St. Louis Metropolitan East area in 2012. Figures differed by 353,683 gate cubic yards from year to year.

Three landfills rank in top 10 listing for waste receipts

Roxana Landfill Inc., Roxana, had the distinction of ranking third in the state in terms of quantities of municipal waste disposed in landfills during 2012. Milam Recycling and Disposal Facility (RDF), East St. Louis, ranked fifth and Cottonwood Hills RDF ranked ninth. These three landfills together accepted 18 percent of the waste that was disposed of in landfills in the State.

About 43 percent of wastes disposed in the Region came from three other states

Of the more than 7.1 million gate cubic yards of waste accepted, almost 3.1 million gate cubic yards originated outside Illinois.

Three Region Six landfills received 43 percent of their waste from these three states: Iowa, Kansas and Missouri.

Three landfills that accepted waste from other states and out-of-state percentages follow: Cottonwood Hills RDF, Marissa, (51 percent of receipts at the site were from Missouri); Milam RDF (36 percent of receipts at the site were from Iowa, Kansas and Missouri) and Roxana Landfill Inc. (47 percent of its waste receipts came from Missouri).

The total percent of out-of-state waste accepted from nine other states in all Illinois landfills during 2012 was 13.0 percent, down less than one (0.3) percent from the previous year.

Landfill capacity decreased by 8.8 percent year to year

On January 1, 2013, three of Region Six's landfills reported that capacity had decreased by more than 11.1 million gate cubic yards, providing 8.8 percent less capacity this year. Landfill operators reported 16 years of landfill life in the Region. This is next to the least amount of landfill life remaining in a Region; only one Region has less. Region Two: Chicago Metropolitan has 11 years of landfill life remaining. Statewide, there are 26 years of landfill life remaining.

The more than 86.4 million gate cubic yards of capacity reported by third-ranked Cottonwood Hills RDF on January 1, 2013 is 74.9 percent of the landfill capacity available in the Region, and is also 8.2 percent of the capacity available in the state.

Still the Region reports 16 years of landfill life remaining at its three landfills.

New landfill in East St. Louis proposed for October 2013

Waste Management, the owner/operator of North Milam Recycling and Disposal Facility reports it could open in October 2013; having already received the operating permit from Illinois EPA on August 6, 2013. Because it is located in Madison County, the inspectors in that county will regularly inspect the facility, with oversight from field inspectors in Illinois EPA's Collinsville Regional Office.

Bond County Landfill Inc. *(Inactive, Certified Closed, 7-19-12)

County	Bond
Municipality	Greenville
Location	825 Willard Street, RR 3
Location 📍	N/A

*Inactive since 3-31-10. In 2011-2012, the site was not open for business at all. Certified closed on 7-19-12.

Facility Facts

Identification number	0050055055
Design capacity, cu.yds.	4,500,000
Total permitted landfill area, acres	217
Permitted disposal area, acres	63
Highest permitted elevation, feet (msl)	605
Years remaining, estimated by landfill	N/A
Date/year to open -- Date/year to close	2-7-95 - 2010*

*Site ceased accepting waste for business reasons on 3-31-10. During the construction seasons of 2010 and 2011, the site has completed final cover construction and grading, in preparation for site closure. Construction of final cover and gas management system documentation approved on 5-23-12. Submittal of affidavit for certification of completion of closure approved by the Agency on 7-19-12.
