Re: Facility: Mississippi Sand – City: Ottawa, IL - County: LaSalle
Notice of Coverage Under Construction Site Activity Storm Water General Permit
NPDES Permit No: ILR10P797

Dear NPDES Permittee:

We have reviewed your application and determined that storm water discharges associated with industrial activity from construction sites are appropriately covered by the attached General NPDES Permit issued by the Agency. Your discharge is covered by this Permit effective as of the date of this letter or as identified by the conditions of the Permit. The Permit as issued covers application requirements, a storm water pollution prevention plan and reporting requirements.

Issuance of coverage of construction site activities under this general permit does not constitute Agency approval of mining activities on this site.

As a Permit Holder, it is your responsibility to:

1. Submit a modified Notice of Intent of any **ownership or address change** to the Permit Section within 30 days;
2. **A Notice of Termination** must be sent to the Agency, at the address indicated on the Notice of Termination, once your construction project has been **completed and the site is properly stabilized**. A Notice of Termination form has been enclosed for your convenience;

This letter shows your facility permit number below the construction site name. Please save this number and reference it in all future correspondence. Should you have any questions concerning the Permit, please contact Terri LeMastes at 217/782-0610, or at the above address.

Very truly yours,

Alan Keller, P.E.

Manager, Permit Section
