

Illinois Environmental Protection Agency

Notice of Informational Public Meeting
for
Illinois' Lead Rulemaking

The Illinois Environmental Protection Agency is preparing a new regulation to improve air quality in the two areas of the state that do not meet the federal standard for the amount of lead in the ambient air. The area of Chicago bounded by Damen Avenue on the west, Roosevelt Road on the north, the Dan Ryan Expressway on the east, and the Stevenson Expressway on the south is one of the two areas designated. The Illinois EPA is required to design a plan to bring the area into attainment of the federal National Ambient Air Quality Standard for lead. This plan must be incorporated into Illinois' environmental regulations to become effective. The Illinois EPA has developed a draft regulation and will be submitting it to the Illinois Pollution Control Board (IPCB) to be codified in Illinois' regulations. Before submission to the IPCB, the Illinois EPA is holding an Informational Public Meeting to provide information and answer questions from the public about this action.

The Public Meeting will be held on:

Tuesday, July 9, 2013
6:00 pm – 8:00 pm
La Casa Resource Center
1815 S. Paulina Street
Chicago, IL 60608

The Illinois EPA will have informational materials available, will be making a presentation explaining the rulemaking and will have staff available to answer questions afterward.

Copies of the draft regulation may be found on the Illinois EPA website at <http://www.epa.state.il.us/public-notices/> The Illinois EPA will be accepting comments on its draft regulation until July 25, 2013. Please submit comments to Brad Frost at the address listed below.
