

PUBLIC NOTICE

In accordance with the requirements of the Groundwater Protection Act, notification is hereby provided to the owners of private, semi-private, and non-community water systems of the possibility that wells in the delineated region may have been concaminated with vinyl chloride, tetrachloroethylene, trichloroethylene, cis-1,2 dichloroethylene or trans-1,2-dichloroethylene. These chemicals have been detected by Illinois Environmental Protection Agency testing and may still be present above Maximum Contaminant Levels in the area delineated on the map, which includes Nokomis and the area to the west of town. The EPA recommends the testing of wells within the outlined area for the mentioned contaminants. For information regarding this matter or private testing labs you may contact Kurt Neibergall with the Environmental Protection Agency at 782-5562, or Jodi Schoen with th Montgomery County Health Department at 532-2240.
