

How Will You Care For The Environment?

By Eliana Avila

Slash your trash...

Recycle, Compost, Reduce,
Repair, and Reuse

To care for our Earth, what will you do?

Recycle to score...

Paper, cans, bottles, cardboard,
Foil, and so much more

Compost to the sound...

Tea bags, egg shells, plum pits, coffee grounds,
Fruit and veggie scraps spin round and round

Reduce is not a flop...

Lights out, water off, locally shop,
Ride bikes, fossil fuel burning: stop

Repair flows...

Resole shoes, mend clothes,
Paint cabinets, and fix what mows

Reuse is a blast...

Cloth napkins, Ziplocs, glass,
Water bottles, paper, and grocery bags

We can all do our parts,

If we look within our hearts,

So slash your trash!
