Press Release

Anticipated Date	Illinois EPA Action or Award Deadline
December 18, 2023	Release NOFO
February 2, 2024	Close the Application Period
April 2024	Send a Notice of State Award to selected applicants for signature
July 2024	Provide fully executed grant agreement to grant recipients
March 2026	Projects must be completed by Grantee
April 2026	Grantee must submit Final Reimbursement Request to Illinois EPA

AmpliFund

- Integrated directly into GATA system
- Reduces opportunity for errors and missing information in applications
- Does not allow application submittal after the deadline

Grant Application System

Grant Accountability and Transparency Act (GATA)

What is GATA in Illinois?

The Grant Accountability and Transparency Act (GATA), became law as Public Act 98-0706 effective July 16, 2014. The purpose was to establish uniform administrative requirements, cost principles and audit requirements for state and federal awards.

Because grants are a significant funding mechanism for Illinois, distributing roughly \$15.8 Billion in grants in FY21, GATA is a foundational element promoting performance transparency and financial integrity of taxpayer dollars.

Energy Efficiency at Public Water Infrastructure

[Public Water Infrastructure Energy Efficiency Asse...](#)

Public Water Supply Energy Efficiency Grants

[Waste Water Treatment Plant Energy Efficiency Gran...](#)

Public Water Supply Energy Efficiency Grant Program

Applications due February 2, 2024 by 5:00 pm.

The Illinois EPA Office of Energy will award funding to for energy efficiency upgrades at public water supply (PWS) facilities, also referred to as drinking water treatment plants (DWTP). Funding for this program is provided by the U.S. Department of Energy (USDOE) State Energy Program (SEP) supplemental funding available through the Infrastructure Investment and Jobs Act (IIJA).

The Public Water Supply Energy Efficiency or PWS EE Notice of Funding Opportunity (NOFO) will offer awards ranging from \$20,000 to \$500,000. The projects must reduce the amount of energy consumed by water treatment operations and must be identified in an energy efficiency assessment completed within the past 5 years. Match is required.

PWS EE applications will undergo a comprehensive, merit-based review; the detailed scoring factors are outlined in the NOFO provided below. Important to note, additional points given to applications serving projects in an [Illinois EPA Office of Environmental Justice Area of Concern](#) AND/OR for projects located in municipally owned electric utilities or electric cooperatives.

CSFA Number 532-30-3312

CSFA Popular Name PWS EE Grant Program

Title Public Water Supply Energy Efficiency Grant Program

Description The U.S. Department of Energy (USDOE) State Energy Program (SEP) provides funding and technical assistance to advance state-led energy initiatives and maximize the benefits of decreasing energy waste, per 10 CFR 420. Funding for this grant program comes directly from the USDOE Infrastructure Investment and Jobs Act (IIJA) SEP program funding. The Illinois Environmental Protection Agency (IEPA) Office of Energy is responsible for state-level program development and management, including the application process with determined criteria for this grant program and establishment of projects eligible for funding aimed at reducing the energy burden for Illinois consumers.

Illinois EPA Office of Energy intends to fund the implementation of energy efficiency projects at public water supply (PWS) facilities, also referred to as drinking water treatment plants. Eligible energy efficiency measures identified in the projects must have been identified in an earlier energy efficiency assessment. Projects will be scored and selected based on project cost effectiveness as determined by proposed energy savings (kWh) per dollar invested and energy cost impact. Additional points will be added to any application that includes a project serving an area of environmental justice concern, as identified by the Illinois EPA Office of Environmental Justice AND for projects served by municipally-owned electric utilities or electric cooperatives. Energy burden (%) of the PWS service area will be used to break a tie.

This award is funded from USDOE SEP funds through IIJA. The projects to be funded are:

Energy efficiency projects (minimum of \$20,000 and maximum \$500,000) at publicly owned PWS located in the State of Illinois.

The number of awards will depend on the number of applications received and the level of funding requested. The Agency may offer partial awards if available funding remains but is less than the limits set forth under Eligibility Information. The performance period is anticipated to begin July 2024 and grantees will be reimbursed for qualifying costs incurred after the execution of the grant agreement through March 2026.

Eligible costs include equipment, labor, service, contractual, administrative, and indirect costs.

Awarding Agency Name Illinois Environmental Protection Agency

Agency Contact Name Adena Rivas

Cost match requirement

- **10%** match if located in an Illinois EPA area of Environmental Justice concern
- **20%** match if located outside an EJ area of concern

Evaluation & Scoring

Criteria

1. Criteria

All applications will be reviewed for completeness, technical merit, and adherence to the competitive grant evaluation criteria described in this NOFO. Applications found to be complete will undergo a comprehensive, merit-based review performed in compliance with GATA and 2 CFR 200 Uniform Requirements. The merit-based review is designed to evaluate projects against the following criteria in priority order:

- **Cost Effectiveness.** All applications that meet the administrative and merit-based criteria will be evaluated for cost effectiveness. Applications will be ranked by the project's Cost Effectiveness score generated by calculating energy savings (kWh) per dollar invested. A score calculation based on cost effectiveness for proposed projects has been provided as an example below.

25 window replacement + labor = \$26,090 total cost (\$25,578 requested + \$512 cost match)
Energy savings from project = 7,000 kWh per window or 175,000 kWh for total project

Project score = $175,000 \text{ kWh} / \$25,578 = 6.8$

- **Energy Cost Impact.** An overarching objective of this NOFO is to reduce the total amount of energy used for public water supply facilities in the State of Illinois. The following Energy Cost Impact criteria will result in additional points added to the Cost Effectiveness score:
 - a) **Savings.** The total energy cost impact for the proposed projects will be ranked by the percentage of improvement for the project's anticipated energy cost savings to treat one million gallons of drinking water (\$/MG). A score will be assigned based on the percentage of savings from the project. Projects that save applicants the greatest amount of energy per year will receive the highest score (most likely to receive an award). Projects that save applicants the least will receive the lowest score.

The objective of this criterion is to award funding to projects that result in the greatest savings to public drinking water treatment plants in the State of Illinois. A score based on the percentage of improvement for the proposed project has been provided as an example below.

$\$96/\text{MG}$ Current cost to treat one million gallons - $\$63/\text{MG}$ anticipated cost to treat one million gallons of Water (\$/MG) - $\$96/\text{MG}$ Current cost to treat one million gallons = $\$33/\text{MG}$ decrease in cost after project completion

Savings Percentage from project = $\$33/\text{MG}$ decrease in anticipated cost after project completion / $\$96/\text{MG}$ pre-project cost to treat one million gallons = 0.3438

Total percentage improvement = $0.34375 \times 100 = 34.38\%$

Project score for Energy Cost Impact = 3.4 Points

Instructions

An applicant eligibility checklist is provided below. If the answer to any of the following questions is **no**, the proposed project will not be considered for funding.

Criteria

Is the project located in Illinois? *

- Yes
- No

Is it part of a publicly-owned water facility? *

- Yes
- No

When was the most recent PWS energy efficiency assessment performed by a third-party assessor? *

- Before 2018
- 2018 or After 2018

Did the energy efficiency assessment yield written recommendations for energy efficiency projects? *

PWS Energy Efficiency Assessment

Projects must have been identified in an energy efficiency assessment completed by a third-party assessor within the last five years. For purposes of this NOFO, "energy efficiency assessment" means a review of the PWS facility, equipment and process conducted by someone other than facility staff that resulted in facility-specific written recommendation(s) with the purpose of improving energy efficiency or reducing energy costs. A copy of the original assessment must be attached to the application materials and include the following information:

- a. A description of existing, relevant PWS facility equipment and processes;
- b. Information about energy consumption of existing, relevant PWS facility equipment and processes;
- c. A description of new equipment and process(es) that would improve energy efficiency or reduce energy costs; and
- d. An estimate of energy and cost savings resulting from the equipment and proposed process change.

Budget

Instructions

This form is used to apply to individual State of Illinois discretionary instructions, if attached. The applicant organization should refer to the instructions for more information.

You must consult with your Business Office prior to submitting a budget.

Although the degree of specificity of any budget will vary depending on the proposal being funded, a well-prepared budget should be realistic and to estimate costs accurately. Your budget should justify all expenses.

You can add budget line items directly below.
