Association
Sustainable. Resilient. Essential.

Leading on Packaging Policy...

AMERIPEN advocates at state and federal levels to shape packaging-related policies, ensuring laws represent a fair compromise that balances economic opportunity and sustainability goals.

Initial advocacy focus was extended producer responsibility (EPR) but that has expanded to address new policy challenges: labeling, recycled content, source reduction, chemicals in packaging, among others.

We provide a unified industry voice through our trusted, proactive and collaborative approach, working across the value chain with various external stakeholders.

...Driven by Sustainability

Sustainability has shaped packaging policy for decades – effective advocacy requires understanding industry challenges as opportunities.

AMERIPEN promotes the value of packaging while minimizing social, environmental, and economic impacts.

Our research drives proactive, evidence-based strategies for sustainable packaging systems and policy.

We combat negative narratives by highlighting passionate industry leaders and sustainability across people, products, and operations.

Key Issues

Initial EPR State Differences – ME, OR, CO and CA

Emerging EPR Frameworks – MN, MD and WA

Key Definitions

Producer Responsibility Model

Financing Structure

Performance Goals

Acceptable Materials Lists

Fees & Timelines

Key Definitions

Producer

- Consistency with MN, MD and WA laws
- Clear waterfall
- Brand-owner responsibility
- Ability to delegate – under a disclosed agreement

Consumer

- Residential consumer
- Clear limits to public space

Covered Materials

- Packaging
- Products?

Recycling

- Technology neutral
- Consistency – MN, MD and WA

Producer Responsibility Model

Producer Run & Governed

- CAA
- 501C3
- State specific organizations
- National uniformity needed
- Alternative Collection Plans

Producer planning and data collection

State plan oversight

State service provider registration process

- Reimbursement Registration

Financing Structure

Clear funding formula –
MN, MD and WA

- 50%, 75% and 90%

Defined covered
activities

- Collection, Transportation, Processing – NO
landfill costs

Defined covered entities

- Residential, defined public spaces, schools

Service Provider Data for
reimbursement

- State Registration
- PRO payments

Producer funded
infrastructure investment

- Ownership should not be prohibited but work
with current providers

Program Goals

Needs Assessment, Data-driven

Equitable & Achievable

Recyclable, reusable or compostable

Harmonized and Streamlined

Ability to Adapt

PRO Plan driven

Acceptable Materials Lists

Statewide uniformity

- Waivers for local conditions

Linkages with performance goals

- Performance goals must reflect what is required to be accepted

On-ramps

- Critical to signal markets

Non-curbside & Alternative Collection Programs

- Unique materials/products
- Separate/supplemental collection infrastructure
- Approved by the Department
- Separate or in coordination with PRO

Fees & Timelines

Fees

- PRO driven
- Eco-modulated
- Recyclable, Reusable or Compostable

Timelines

- Initial Registration vs. Plan Submission
- 3-year on-ramp to program
- 5-year Plans
- Annual Reports
