

Nutrient Science Advisory Committee

Tentative Conclusions and Next Steps

February 14, 2018
Conference call

TENTATIVE CONCLUSIONS

The committee agreed to proceed with the “sensitivity and specificity” approach for identifying numeric TP and TN recommendations for non-wadeable streams and rivers. Doug will lead this analysis.

NEXT STEPS

- Todd will review Tetra Tech’s prior analyses to determine if an ecoregional approach is appropriate for non-wadeable streams.
- Candice will add data from EPA Wadeable Streams Assessment to the lines of evidence table for wadeable streams.
- Next meeting will focus on finalizing recommendations for wadeable streams.

Future meetings and calls

- Face to Face: February 27, 9 am central time in Urbana.
